

Internet2

Mike Roberts
Project Director
Internet2

Internet2 Project

Priorities

- re-create leading edge R&E network capability
- enable new generation of applications
- integrate with production environment

Internet2 Project

Applications

- interactive, network-based instruction
- real time, sensor-based modeling/simulation
- large scale, multisite computation
- very large database processing

Internet2 Project

Technical Objectives

- implement scaled up internet protocols
- voice and video
- interoperability with wireless media
- quality of service choices
- measurement/optimization

Internet 2 & Next Generation Internet
